

Dear Mr. President of the Academy, Respected Colleagues, Dear Guests,

It is my pleasure to welcome you on behalf of the Medical Faculty in Skopje.

During its 60 years of existence, the Skopje Medical Faculty has accomplished numerous genuine goals in the framework of the medical science.

There are 244 professors and associate professors as well as 365 teaching assistants employed at 32 Chairs of the Faculty.

At the Medical Faculty there are 1545 students and until May of this year about 10 000 students will be graduated.

The launching of this project is highly important in further understanding of neurofunctionality and new knowledge will imply new thinking in clinical fields and broader.

Thus, Chair of Pediatric Psychopathology, Chair of Neurology and Chair of Psychiatry from the Medical Faculty will be included in the research activities.

I believe that the realization of this project will gain both domestic and international value.

In the end, allow me to wish you a successful work and fruitful collaboration.

Dean of the Faculty of Medicine
Prof. Dr. Magdalena Zanteva-Naumoska
