

## **Publication Ethics**

Ethical standards for publication exist to ensure high-quality scientific publications, public trust in scientific findings, and that people receive credit for their ideas. Scientific misconduct is defined by the [Office of Research Integrity](#) as "fabrication, falsification, plagiarism, or other practices that seriously deviate from those that are commonly accepted within the academic community for proposing, conducting, or reporting research." Prilozi/Contributions is a member of the [Committee on Publication Ethics \(COPE\)](#) and abides by its Code of Conduct and aims to adhere to its Best Practice Guidelines.

### *Plagiarism*

The journal Prilozi/Contributions is committed to publishing only original material, i.e., material that has neither been published elsewhere, nor is under review elsewhere. Manuscripts that are found to have been plagiarized from a manuscript by other authors, whether published or unpublished, will incur plagiarism sanctions.

### *Duplicate Submission*

Manuscripts that are found to have been published elsewhere, or to be under review elsewhere, will incur duplicate submission/publication sanctions. If authors have used their own previously published work, or work that is currently under review, as the basis for a submitted manuscript, they are required to cite the previous work and indicate how their submitted manuscript offers novel contributions beyond those of the previous work.

### *Citation Manipulation*

Submitted manuscripts that are found to include citations whose primary purpose is to increase the number of citations to a given author's work, or to articles published in a particular journal, will incur citation manipulation sanctions.

### *Data Fabrication and Falsification*

Submitted manuscripts that are found to have either fabricated or falsified experimental results, including the manipulation of images, will incur data fabrication and falsification sanctions.

### *Improper Author Contribution or Attribution*

All listed authors must have made a significant scientific contribution to the research in the manuscript and approved all its claims. It is important to list everyone who made a significant scientific contribution, including students and laboratory technicians.

### *Redundant Publications*

Redundant/salami publications involve the inappropriate division of study outcomes into several articles.

### *Sanctions*

In the event that there are documented violations of any of the above mentioned policies in the journal appropriate sanctions will be applied following the international standards and recommendations.
